-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 14, lines 9, 15 and 18, the "mast" and the "rail portions" have both been referenced by reference numeral "6"; on page 17, line 11, reference numeral "223" should read --222--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3726

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Muller (US Patent 3,100,382) or Taylor (US Patent 3,279,195) or Glass et al. (US Patent 5,407,304).

Taylor discloses a press-in apparatus for Z profile sheet pile (fig. 8) and a press-in method for pressing a Z profile sheet pile wherein the apparatus comprises a press-in section for grasping a Z profile sheet pile having clutches at both ends and pressing-in simultaneously two Z profile sheet piles joined to each other at their clutches, see column 1, lines 60-71 and column 3, lines 61-75. Applicant should note that the grasping mechanism of Taylor is adjustable so as to accommodate the pitch and type of piles to be used, thus could be adjusted to grasp the piles at any desired position.

Likewise Glass et al. discloses a press-in apparatus for Z profile sheet pile and a press-in method for pressing a Z profile sheet pile wherein the apparatus comprises a press-in section for grasping a Z profile sheet pile having clutches at both ends and pressing-in simultaneously two Z profile sheet piles joined to each other at their clutches, see column 4, lines 46-68 and column 5, lines 1-25 and figures 4 and 14. The apparatus of Glass et al. can grasp the piles at any desired position.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
